1. Introduction

This handbook contains important information about the undergraduate program in the Department of Mechanical Engineering at San Diego State University (SDSU). It is expected that you will study this handbook carefully, together with the SDSU general catalog. Furthermore, the department website at mechanical.sdsu.edu contains more detailed information about the department including the undergraduate and graduate programs, the faculty and staff, the laboratories, research activities, and various student organizations. If there are specific questions that have not been addressed in this handbook, the catalog, or on our website, please feel free to contact the ME Department. For academic information and advising related to non-departmental (General Education) courses, please contact the Academic Advising and Evaluations Office ((619) 594-6668). Their website (http://arweb.sdsu.edu/es/advising/) has extensive information and answers to frequently asked questions. Students may also contact the Assistant Dean of Engineering for Student Affairs, Theresa Garcia (E-mail: tgarcia@sdsu.edu, Phone: 619-594-5807, Office: Engineering 200B).

2. General Information

2.1 Mission Statement

To prepare our graduates to apply basic and advanced mechanical engineering knowledge and skills to the design, analysis and research of engineering systems; to innovate and lead in providing engineering solutions to address societal challenges; to pursue lifelong learning that can exploit opportunities in a changing world.

2.2 Departmental Vision

We aspire to be among the best Mechanical Engineering Departments by offering high quality education, engaging in innovative research and high impact community activities that foster a cleaner, healthier, safer, and sustainable world. We strive to produce world-class engineers who are prepared to lead in providing engineering and technological solutions to societal challenges.

2.3 Program Educational Objectives

The Program Educational Objectives of the Mechanical Engineering Program at SDSU are to matriculate Bachelor of Science graduates who upon the years following graduation are committed to:

1. Applying an open-minded, critical, and pragmatic approach to the analysis of problems and the design of innovative and sustainable engineering solutions in professional practice (Professional Practice).
2. Actively participating in continuous professional development (Professional Development).
3. Responsible, professional and ethical conduct with a broad appreciation of the world and the role that engineering plays in society (Service and Citizenship).

2.4 Mechanical Engineering Program Outcomes

Program outcomes are statements that describe what students are expected to know and be able to do by the time of graduation. These relate to the skills, knowledge, and behaviors that students acquire in their matriculation through the program. We have a continuing assessment process in place in order to collect and interpret data to evaluate the achievement of program outcomes. The nine program outcomes for the SDSU Mechanical Engineering program are listed in the table on the following page.
Mechanical Engineering Program Outcomes (POs)

| PO 1: An ability to identify, formulate and solve complex engineering problems by applying principles of engineering, science, and mathematics. |
| PO 2: An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental, and economic factors. |
| PO 3: An ability to communicate effectively with a range of audiences. |
| PO 4: An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts. |
| PO 5: An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives. |
| PO 6: An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions. |
| PO 7: An ability to acquire and apply new knowledge as needed, using appropriate learning strategies. |
| PO 8: An ability to apply principles of engineering, basic science, and mathematics (including multivariable calculus and differential equations); to model, analyze, design and realize physical systems, components or processes. |
| PO 9: An ability to work professionally in either thermal or mechanical systems area. |

2.5 Programs of Study
The Bachelor of Science in Mechanical Engineering (BSME) offered by the Department is a rigorous blend of theory and practice, emphasizing engineering fundamentals. The program is accredited by ABET, i.e. the Accreditation Board for Engineering and Technology (www.abet.org). A BSME program with Bioengineering emphasis is also offered. The Department offers an integrated (4+1) BS/MS program (see page 18) to give our most qualified undergraduates the opportunity to earn a Master's degree in either mechanical engineering or bioengineering. In addition, the Department offers courses of study leading to the Master's and Doctoral degrees. The Doctoral degree in engineering disciplines is offered through the Joint Doctoral Program (JDP) with the University of California, San Diego (UCSD). Detailed information about these degrees is available at the departmental website.

2.6 Distinctive Features of our Program
- The program offers a unique blend of theory and practice culminating in the senior capstone design project which spans two semesters when students work in groups on sponsored projects.
- The broad range of professional electives offered allows students to tailor their studies to their own career interests.
- A BSME program with bioengineering emphasis is offered.
- There are opportunities for undergraduate research with professors of international reputation in the areas of bioengineering, energy and thermofluids, particulate material science and processing, manufacturing, mechanics, micro- and nano- electromechanical systems (MEMS and NEMS), mechatronics, robotics, and dynamic systems and control.
- There are excellent employment opportunities: many seniors have at least one job offer before graduation.
- The mechanical engineering major is an impacted program. Please see Section 4.3 for more details.
3. Timeline: Admission to Graduation

3.1 Transferring to Mechanical Engineering from Undeclared or another Department

You will be considered for transfer to major status in the department from either an undeclared status or from another department only if your cumulative GPA is at least 2.7 irrespective of your catalog year. Note that this does not mean your request will be approved, but only that it will be considered. If you are transferring to pre-major status in the department, more stringent conditions will apply. Please see worksheet on page 18.

- Upper division courses will be taken during this phase of your study.
- Graduate (600-) level courses require a minimum GPA of 3.0 and the permission of the class Instructor (please see worksheet on page 16). Furthermore, if you plan to use the course as an elective, you must get a RAAR form approved by the Chair before taking the course (see page 15)
- Updated Master Plans must be filed in order to register for ME310 and ME 490A.

- Impaction criteria courses must be completed with minimum of C grade and overall GPA of 2.5 or higher for catalog years 2015-2016 & 2016-2017, and an overall GPA of 2.7 or higher for catalog year 2017-2018 and thereafter. Please see worksheet on page 17.
- Lower division courses must be completed.
4. Curriculum for the B.S. Degree in Mechanical Engineering & B.S. Degree in Mechanical Engineering with Bioengineering Emphasis

4.1 Introduction
The undergraduate program in Mechanical Engineering (BSME) is built upon a rigorous academic foundation that includes a broad curriculum of natural sciences, mathematics, electives in General Education in humanities and social sciences, as well as professional electives in Mechanical Engineering. Although students are encouraged to concentrate their professional electives in a sub-field of interest in mechanical engineering, there are no formal “tracks” within the sequence. For students who entered the BSME program in the academic year 2019-2020, the Mechanical Engineering curriculum, i.e., the SDSU Major Academic Plan (MAP), is given below in Section 4.2.1 (see also, https://sunspot.sdsu.edu/pubred/?mymap.disp). The department also offers the option for students to pursue a BSME degree with an emphasis in bioengineering. The MAP is given in section 4.2.2.
4.2 Recommended Sequence of Courses

The Academic Plan provides a recommended sequence of courses. Refer to the SBSE General Catalog for a complete description of requirements and credit limitations.
4.3 Additional Notes on Courses

As shown on the previous pages, the curriculum consists of 140 units for BSME and BSME with Bioengineering emphasis that are distributed in four categories of courses as follows:

4.3.1 Major Preparation [Major Prep] Courses

There are 53 units of Major Preparation Courses: ME 101, 102, 200 [or AE 200], 202, 220 [or AE 220], 240, 241; AE 280; BIO 100 or 101; CHEM 202 (or 200); EE 204; MATH 150, 151, 252; PHYS 195, 195L, 196, 196L, 197. The following courses: ME 200 [or AE 200]; CHEM 202 (or 200); MATH 150, 151; PHYS 195, 196 must be completed with a grade of C (2.0) or better. These courses cannot be taken for credit/no credit (Cr/NC). BIO 203 is required for BSME with Bioengineering emphasis. PHYS 197 may be substituted with BIO 212, CHEM 201, OR CHEM 232 AND 232L for BSME with Bioengineering emphasis.

4.3.2 General Education [GE] Courses

There are 55 units of General Education [GE] Courses in Communication and Critical Thinking (9 units), Foundations of Learning (31 units), American Institution (6 units), Explorations of Human Experience (9 units). 16 out of 31 units for Foundations of Learning can be satisfied by select ME Major Prep courses (BIO 100 or 101; CHEM 202 or 200; MATH 150 or 151; PHYS 195L or 196L). All general education requirements and limitations, as well as listings of the approved GE course electives are given in the 2019-2020 General Catalog (see page 95). In case you have any questions about GE courses, you should contact the Assistant Dean of Engineering for Student Affairs, Theresa Garcia (Email: tgarcia@sdsu.edu; Phone: 619-594-5807, Office: Engineering 200B).

4.3.3 Graduation Writing Assessment Requirement

All students are required to either pass the Writing Placement Assessment (WPA) with a score of 10 or complete one of the approved upper division writing courses with a grade of C or better. See, the “Graduation Requirement Section” of the 2019-20 General Catalog for a complete listing of requirements. If you have any questions about WPA or other placement tests, contact the Assistant Dean of Engineering for Student Affairs, Theresa Garcia (Email: tgarcia@sdsu.edu; Phone: 619-594-5807, Office: Engineering 200B).

4.3.4 Impacted Program

The mechanical engineering major is an impacted program. To be admitted to major status, students must complete MATH 150, 151, PHYS 195, 196, CHEM 200/202, and ME 200 with a C grade or better and have an overall cumulative GPA of 2.7. These courses cannot be taken for credit/no credit (Cr/NC). The Department expects students to meet these criteria and get admitted to major status no later than the end of the sophomore year. The Department has a retention policy which is stated in Section 4.3.6 below.

4.3.5 Major [Major] Courses

For the BSME program, the major courses consist of 48 upper division courses: ME 304 (or CIV E 301), 310, 314, 330, 350, 351, 452, 490A, 490B, 495, 520, 555; AE 340 (or ME 496: Fluids Engineering), AE 341, and 9 units of Professional Electives. These 9 units of coursework may be selected from any non-required 400- or 500-level mechanical engineering course, or approved courses from other departments (AE 515, AE 535, or other approved courses). In rare situations, a student may be allowed to take a 600-level course as an elective with approval from the Instructor and the Chair (who has to approve a RAAR form). To do this, the student must have a minimum GPA of 3.0.
For the BSME with Bioengineering emphasis program, a minimum of 51 upper division units to include ME 304 (or CIV E 301), 310, 314, 330, 350, 351, 452, 490A, 490B, 499 (3 units), 520, 555, 580, and 585; AE 340 (or ME 496: Fluids Engineering), AE 341, BIO 336, 436. BIO 336 will also satisfy three units of the GE Explorations of Human Experience, Natural Sciences.

**Pre-major students are not permitted to take major courses with the exception of ME 304.**

**Elective courses can only be taken by students in senior standing.**

### 4.3.6 Department Policies on Courses

The following policies will be applied by the Mechanical Engineering Department:

1) The Department does not approve a second retake of a course, i.e. taking a course a third time. If a student fails a course twice, the student is advised to find another program of study.

2) If a student takes a course at another institution with which SDSU has an articulation agreement for that specific course, a RAAR form (see page 16) does not have to be approved or filed. Please check at the websites [www.assist.org](http://www.assist.org) and [www.sdsu.edu/TAP](http://www.sdsu.edu/TAP) to make sure that there is an articulation agreement. Note that the Department does not currently have an articulation agreement in place for any ME course with an Institution outside of California.

3) If an articulation agreement is not in place, the student must get a RAAR form approved by the Chair and have it on file before that course is taken. The content of the course, the mode of instruction, and the methods of assessment are among the factors that will be considered in evaluating a request. It is recognized that course syllabi for standard courses in engineering are generally similar across institutions and so the syllabus by itself will carry little weight in the decision on whether a RAAR form is approved. RAAR forms for major courses are approved only in exceptional cases. ME courses must be taken from an ABET-accredited program.

4) The Department has a retention policy (see page 356 of the General Catalog). The Department expects the student to make reasonable academic progress toward the degree. If a student is in premajor status but has either (i) completed the major preparatory courses, earned 60 units, but has less than a 2.7 cumulative GPA; or (ii) earned 60 units but has not completed major preparatory courses and/or has less than a 2.7 cumulative GPA, the student may be removed from the premajor and placed in undeclared. The Department is currently phasing in the implementation of this policy with a warning given one semester in advance of the student being removed.
5. The Master Plan

The Master Plan, forms of which are shown on pages 13 (BSME) and 14 (BSME with Bioengineering emphasis), is a summary sheet showing the sequence of courses that the student plans to take and it provides a plan for graduation for the student and adviser. Each continuing student must see his or her adviser on a regular basis to monitor proper progress toward the degree, to make adjustments to individual schedules as appropriate, and to provide career guidance. Students are introduced to the Master Plan for the first time when they take ME 102 (Solid Modeling II) in the Spring semester of their freshman year. The instructor of ME 102 requires students to send a completed Master Plan electronically to the ME Department Office (mech.engineering@sdsu.edu) before the students are assigned a final grade for the course. Failure to do so will result in a reduction of one grade point. In addition, ME 310 and ME 490A are gateway courses for students. In order to enroll in these courses, students must have a registration hold removed from their computerized records. The hold is removed after they have turned in their completed and updated Master Plan electronically and the plans have been checked by the department. Failure to keep an updated Master Plan in the ME Department Office (E326) may result in delays of processing any requests from students and potentially delay graduation.

The electronic Master Plan forms are available at the ME website (http://mechanical.sdsu.edu/mechanical/forms.aspx) and on Blackboard (https://blackboard.sdsu.edu/).
**MECHANICAL ENGINEERING MASTER PLAN AND ADVISING RECORD**

**STUDENT RESPONSIBILITIES (Please read before filling out Master Plan)**

1. Students must email the Master Plan Word Document electronically to mech.engineering@sdsu.edu
2. Transfer students must file the Master Plan before they can be considered for major status.
3. If a Master Plan is not filed as required above, you will not be allowed to register in subsequent ME classes.
4. Pre- and co-requisites will be enforced according to the catalog.
5. Ensure all ME and GE requirements are met for graduation.
6. Mechanical Engineering students are encouraged to take ME 496: Fluids Engineering, which is equivalent to AE 340.

Advisor's Name                        Signature                        Date

This is not a legally binding document. Advisors will do their best to assist students with course planning. It is the student’s responsibility to ensure that they are following prerequisite and graduation guidelines.
6. Frequently Accessed Forms and Explanations

6.1 Request for Adjustment of Academic Requirement (RAAR) Form

This is the most frequently used form by undergraduate students. You will need to complete this form and get approval for any course variation from what is indicated in the MAP on pages 8-9 before you take such courses. This includes courses that you plan to take at other institutions. Furthermore, the RAAR form must be approved before you take any 600-level course as an elective.

---

**Request for Adjustment of Academic Requirement**

</tbody>
</table>

Have you applied yet? [ ] Yes  [ ] No

**READ AND FOLLOW DIRECTIONS CAREFULLY**

This form should be used by undergraduate students requesting an exception to an academic policy or regulation. DO NOT request an adjustment unless you have seen an advisor or received an official evaluation.

Submit this petition, along with departmental recommendation when required, to the Academic Advising Center, SSW 1551.

**Attach the supporting documentation:**

1. Syllabus from course in question taken at another institution
2. Copy of your evaluation or graduation evaluation
3. Copy of departmental advising sheet (or major plan)

Upon filing this form with the Office of Advising and Evaluations, please allow up to 8-10 weeks for processing. If the request is approved, the adjustment will be honored on your degree evaluation. If the request is denied, you will receive a copy of this form in the mail notifying you of the decision. If the request is denied because it is in violation of Title V, an executive order from the CSU Chancellor Board of Trustees, and/or SDSU University Senate Policy, there is NO APPEAL. In other cases, a denied request may be appealed to the Dean of the Division of Undergraduate Studies.

**SPECIAL CONSIDERATION REQUESTED (Include explanation for request)**

---

**REQUIRED FOR ADJUSTMENTS TO MAJOR & MINOR ONLY**

Request recommended by __________________________

**COMMENT:**

---

**FOR UNIVERSITY USE ONLY** When approving a course substitution, please initial one of the following:

[ ] The approved course substitution, subject to articulation agreements, applies to ALL students (blanket waiver).

[ ] The approved course substitution applies as an exception for this student only.

Enrollment Services 3/2012
6.2 Undergraduate Request form to Enroll in Graduate Courses

This form (see below) is required for taking 600-level courses: this form along with the RAAR form must be approved and on file BEFORE you take such a course as an elective.

Undergraduate Request Form To Enroll in Graduate Level Courses
(Courses 600-700)

CRITERIA

Student must be an undergraduate senior, having completed a minimum of 90 units.
Student must have an overall GPA of 3.0 or better in her/his last 60 units.

STUDENT INSTRUCTIONS

1. Complete the requested information below.
2. Obtain a copy of your current transcript from the web portal and attach it to this form.
3. Obtain the signature of the instructor along with the schedule number and add code.
4. Bring completed form to the Division of Graduate Affairs for approval and signature.
5. The completed and approved form will be forwarded to the Registrar’s Office.

GPA: ________________

Which, if any, Upper Division Courses have you taken? __________________________________________________________________________

Students must receive a C or better in the major prep courses listed above in order to be able to declare an engineering major. Student must have an overall GPA of 2.50 and above if admitted in Fall 2015 or Fall 2016, or an overall GPA of 2.70 and above if admitted in 2017 and after. Students admitted before Fall 2015 need a 2.10 and above.
Criteria for Change of Pre-Major to Mechanical Engineering

If you are not in pre-major status in Mechanical Engineering and would like to be considered for transfer to pre-major status in the department, you must satisfy the following requirements:

1. You must have completed a minimum of 24 units at SDSU. These units must count toward the requirement for the BSME or BSME with bioengineering emphasis degrees.

   Units taken toward the major: ______________

2. You must have a minimum GPA of 3.0.

   GPA: __________

3. You must have completed MATH 150, MATH 151, PHYS 195, and either PHYS 196 or CHEM 200/202 at SDSU and received at least a minimum of B grade in each subject.

7. Integrated BS/MS (4+1) Programs

7.1 Introduction

Two integrated five-year Bachelor’s-Master’s programs are available in the Department of Mechanical Engineering. These programs are designed to give students the opportunity to focus in a subfield of interest in either mechanical engineering (design and manufacturing, dynamics and control, energy and thermofluids, materials and mechanics) or bioengineering (biomaterials, biomechanics). Upon successful completion of the required coursework and thesis, the students will be simultaneously awarded the B.S. degree in Mechanical Engineering and either the M.S. degree in Mechanical Engineering, or the M.S. degree in Bioengineering.

A BSME student who applies to the program is required to have a Master Plan on file in the ME Office before applying. This plan will show the semester in which the student completes the requirements for the BSME degree. If the student matriculates into the (4+1) BSME/MSME or BSME/MSBioE program, graduate tuition fees will be charged from the semester following the one in which the requirements for the BSME degree are completed as indicated in the Master Plan on file in the ME Office.

To satisfy the requirements for the BS/MS (4+1) degree programs, students must achieve at least a 3.0 average in the 30 units of courses used to satisfy the graduate program of study. Of the 30 units, a maximum of nine units may be in 500-numbered courses. Three 500-level courses may be used to fulfill the undergraduate requirements for the (4+1) BS/MS degree program at the same time as serving as courses for graduate study. For the BS/MS (4+1) degree program leading to the B.S. and M.S. in Mechanical Engineering, students can use any three 500-level ME courses toward their graduate degree. For the BS/MS (4+1) degree program leading to B.S. in Mechanical Engineering and M.S. in Bioengineering, students must take ME 580, and 585 for the biomechanics specialization; ME 580, 540 or 543, and 585 for the biomaterials specialization. Students in the BS/MS (4+1) degree programs must follow the thesis option. The total number of course units required for graduation in the (4+1) program may be 152 if three 500-level courses are double-counted or 155 if a BSME student takes only the two required 500-level courses and fulfills the elective requirements with 400-level electives.
7.2 Important Information and Instructions

Please read the following information and instructions before completing this application to apply to the BS/MS (4+1) program.

Students must apply and be admitted to the BS/MS (4+1) program. A Master Plan must be on file in the ME Office before the application is accepted. If the student matriculates into the (4+1) program, graduate tuition fees will be charged from the semester following the one in which all the requirements for the BSME degree are to be completed as per the Master Plan on file. Once admitted into the program, the student must fulfill all requirements of the BS/MS (4+1) program before being granted the BS or the MS degree. If a student decides to go back to the Mechanical Engineering major BS degree, s/he will not be able to reenter the BS/MS (4+1) program and the graduate units completed cannot count towards a graduate degree at SDSU. The requirements to apply to the program are stated below.

BRING A COPY OF YOUR DEGREE EVALUATION TO ME OFFICE AT E326

STUDENTS MAY APPLY FOR THE PROGRAM AFTER SUCCESSFULLY COMPLETING A MINIMUM OF 90 AND A MAXIMUM OF 115 UNITS THAT COUNT TOWARDS EITHER THE BS OR THE MS PROGRAMS.

REQUIREMENTS TO APPLY FOR THE BS/MS (4+1) PROGRAM:

1. B grade or better in ME 304 (or CIVE 301), ME 350, and AE 340
2. 3.0 overall GPA
3. 3.0 ME Upper Division Major GPA
4. Sum of verbal and quantitative GRE scores must be greater than 306. GRE Quantitative score must be 160 or higher
5. Satisfactory score on the TOEFL, if needed

Exceptions may be considered if a statement of justification is provided by the ME Faculty Adviser and is then approved by the departmental Graduate Committee and the Graduate Division.

SUBMIT COMPLETED APPLICATIONS TO E-326

8. Faculty and Their Research Areas

8.1 Tenured/Tenure-Track Faculty and Their Research Areas

JOHN ABRAHAM, Professor and Chair of Mechanical Engineering. Ph.D., Princeton University.

Research Interests
Dr. Abraham’s research interests are in the areas of multiphase flows, sprays, combustion, internal combustion engines, fuel chemistry, computational fluid dynamics, and high performance computing.

ASFAW BEYENE, Professor of Mechanical Engineering, Director of Industrial Assessment Center. Ph.D., Warsaw University of Technology.

Research Interests
Dr. Beyene’s research has been concerned with energy systems: renewables, efficient power sources with emphasis on combined heat and power applications, cycle and energy analyses, mathematical modeling, and simulation.

AMNEET BHALLA, Assistant Professor of Mechanical Engineering. Ph.D., Northwestern University.

Research Interests

SUBRATA BHATTACHARJEE, Professor of Mechanical Engineering. Ph.D., Washington State University.

Research Interests
Dr. Bhattacharjee’s research is on microgravity combustion and radiation heat transfer, flame dynamics in the space environment, fire detection, infra-red pyrometry, knowledge-based distributed intelligence, and development of the software TEST, The Expert System for Thermodynamics.

JOAQUIN CAMACHO, Assistant Professor of Mechanical Engineering. Ph.D University of Southern California

Research Interests
Dr. Camacho’s research interests spans from Multiphase flows, Sustainable Energy, Nanomaterial Theory and Fabrication, Combustion, Aerosol dynamics, and Carbon Materials.

SUNGBUM KANG, Assistant Professor of Mechanical Engineering. Ph.D., Georgia Institute of Technology

Research Interests
Dr. Kang’s research interests lie in the areas of smart optical metrology, mechatronics/robotics, industrial automation and smart factory.
SAMUEL K. KASSEGNE, Professor of Mechanical Engineering. Ph.D., Virginia Polytechnic Institute and State University, Director of Bioengineering Program

Research Interests
Dr. Kassegne’s research interests are in the areas of MEMS, biotechnology and computational sciences. He is particularly interested in developing novel applications of microfluidic and microarray technology (e.g. in molecular diagnostics), and a multi-scale hybrid algorithms for transport of charged species in micro-devices.

PARAG KATIRA, Assistant Professor of Mechanical Engineering. Ph.D., University of Florida.

Research Interests
Dr. Katira’s research interests lie in using mathematical modeling techniques to study the dynamics of active matter such as cells, tissues, bacterial biofilms and synthetic molecular-motor assemblies as well as the design of synthetic materials that can mimic the self-regulating and self-organizing properties of cells and tissues.

KAREN MAY-NEWMAN, Professor of Mechanical Engineering, Ph.D., University of California, San Diego.

Research Interests
Dr. May-Newman’s research is in the area of Cardiovascular Biomechanics with a focus on the mechanical interaction of the cardiovascular system with implanted medical devices, such as heart valves and left ventricular assist devices (LVADs).

FLETCHER J. MILLER, Associate Professor of Mechanical Engineering. Ph.D., University of California Berkeley.

Research Interests
Dr. Miller’s interests are in the field of thermal sciences, in particular, in microgravity combustion and sustainable energy fields. He is especially interested in developing solar thermal applications in the southwest and California.

KEE S. MOON, Professor of Mechanical Engineering, Ph.D., University of Illinois, Chicago.

Research Interests
Dr. Moon’s research interests are in the field of micro- and nano-fabrication technologies. In particular, he has recently developed various smart sensor/actuator systems including custom designed MEMS-gas and pressure sensors, nano-indentation systems, as well as precision instrumentation and testing devices.

KHALED MORSI, Professor of Mechanical Engineering, Director, Advanced Materials Processing Laboratory. Ph.D., University of Oxford, UK.

Research Interests
Dr. Morsi’s research area is processing and properties of metals, intermetallics, ceramics and their composites. His current activities include synthesis of carbon nanotubes, nanotube reinforced aluminum composites, lightweight in-situ dual matrix composites, and processing-microstructure-properties relations.
PEIMAN NASERADINMOUSAVI, Assistant Professor of Mechanical Engineering, Ph.D., Villanova University, PA.

Research Interests

His research interests include smart flow distribution network, robotics, nonlinear dynamics, control theory, optimization, magnetic bearings and mathematical modeling.

EUGENE OLEVSKY, Dean of College of Engineering, Distinguished Professor of Mechanical Engineering, Director of the Joint Doctoral Program. Ph.D., Ukraine National Academy of Sciences.

Research Interests

Dr. Olevsky’s research encompasses materials science and mechanics applied to processing of powders and porous materials, metals, ceramics, glass, and polymer composites, including nano-materials. His current interests include materials for solid-oxide fuel cells, thermal management of electronic circuitry, hydrogen storage, and solar cells.

SUNG-YONG (SEAN) PARK, Assistant Professor of Mechanical Engineering, Ph.D., University of California, Los Angeles

Research Interests

Dr. Park’s research interests lie in the general area of optofluidic energy and biomedical systems with applications to biomedical sensors, lab-on-a-smartphone systems, water/air quality monitoring, optofluidic solar energy systems, and triboelectric energy harvesting from waste water sources.

KEVIN WOOD, Assistant Professor of Mechanical Engineering. Ph.D., Colorado School of Mines.

Research Interests

Dr. Wood’s interests center around interfacial design, electrochemistry, batteries, electromagnetic radiation and renewable energy technology.

WENWU XU, Assistant Professor of Mechanical Engineering, Ph.D., Beijing University of Technology.

Research Interests

Dr. Xu’s research interests include computational Multiscale Modeling of Materials (continuum, microscopic, atomistic, and quantum mechanics) and characterization of material microstructure at multiple scales from 2D (electron microscopy) to 3D (synchrotron X-ray computed tomography), and 4D (time-resolved tomography).

YANG YANG, Assistant Professor of Mechanical Engineering, Ph.D., Wuhan University and University of California, Los Angeles

Research Interests

Dr. Yang’s research interests include bioinspired 3D printing, ceramic 3D printing, 3D printing of micro-scale superhydrophobic structure, 3D printing of battery and capacitor, novel applications of 3D printing, mechanism of materials and structures, stereolithography, piezoelectric/thermoelectric energy harvesting device, wearable sensor, 4D printing, high dielectric nanocomposites, self-healing materials.
GEORGE YOUSSEF, Associate Professor of Mechanical Engineering. Ph.D., University of California, Los Angeles

Research Interests

Dr. Youssef’s research interests are in the areas of mechanics of nontraditional materials, magnetoelectric composites, in-situ characterization, experimental mechanics, polymer matrix composites, shock waves and biomechanics.

9. Major Research Areas in the Department

This information is provided to assist BS/MS (4+1) students select a Thesis Adviser and BSME students select an adviser for ME499 Projects.

Bioengineering
- Biomaterials (Drs. Katira, May-Newman, Morsi, Park, Youssef)
- Biomechanics (Drs. Katira, May-Newman, Youssef)
- Design of Medical Devices (Drs. May-Newman, Park)
- Neural Engineering (Drs. Kassegne, May-Newman, Moon)
- Sensors, Smart Health (Dr. Kassegne. Moon, Park)
- Tissue Engineering (Dr. Katira)
- Computational Biomechanics/Biofluids (Drs. Bhalla, Katira, May-Newman)

Energy and Thermofluids
- Combustion (Drs. Abraham, Bhattacharjee, Camacho, Miller)
- Computational Methods (Drs. Abraham, Bhalla, Bhattacharjee, Miller)
- Energy Systems (Drs. Beyene, Miller, Park, Wood)
- Renewable Energy (Drs. Abraham, Beyene, Miller, Park, Wood, Yang)
- Multiphase Flows (Drs. Abraham, Bhalla)

Manufacturing
- Additive Manufacturing (Drs. Kang, Yang)
- Defect Inspection (Dr. Kang)
- Materials Processing (Drs. Camacho, Morsi, Olevsky, Wood)
- Measurement and Adaptive Control (Dr. Kang)

Materials Science
- Materials Processing (Drs. Camacho, Morsi, Olevsky, Wood)
- Mechanics of Sintering (Dr. Olevsky)
- Multiscale Modeling of Materials (Dr. Xu)
- Nanocomposites (Dr. Yang)
- Powder Metallurgy (Drs. Morsi, Olevsky)
- Self-Healing Materials (Dr. Yang)

Mechanics
- Biomechanics (Drs. Katira, May-Newman, Youssef)
- Computational Mechanics (Dr. Kassegne, Katira)
- Experimental Mechanics of Non-Traditional Materials (Dr. Youssef)

Microelectromechanical and Nanoelectromechanical Systems (MEMS/NEMS)
- Bio-Nanoelectronics (Drs. Kassegne, Park)
- Computational MEMS (Dr. Kassegne)
- Micro and Nano Fabrication (Drs. Kassegne, Park, Yang)
- Microfluids (Drs. Kassegne, Park)
- Nano Mechatronics (Dr. Moon)
- Polymer Solar Cells (Drs. Kassegne, Wood)
- Sensors (Drs. Kassegne, Moon, Park)

Robotics, Dynamic Systems and Control, Mechatronics
- Dynamic Systems and Control (Drs. Naseradinmousavi, Park)
- Mechatronics (Drs. Moon, Naseradinmousavi, Park)
- Robotics (Drs. Naseradinmousavi, Park)
10. Student Advising

Need Master Plan Advising?
Master Plans and General Advising specific to ME Programs
Allyson Korba
Administrative Support Assistant
ME Office, E-326
(619) 594-7050
akorba@sdsu.edu

Need Peer Advising?
Go to Peer Advising for Engineering Students (PACES).
PACES primary focus is for lower-division engineering students, pre-engineering students, and newly admitted students (including transfers).
PACES provides advice on the following:
- Course planning
- GE Requirements
- Clubs/Organizations
- Introduction to Master Plans
- Early steps to graduation
- New student/Transfer help

PACES is located in the SDSU Center of Student Success in Engineering (CSSE) located in Engineering building, room 221B (E-221B).
*Please bring your Degree Evaluation and your major map.

Need Advice on a Course?
See your course instructor.

Need help with selecting UD Courses?
Please see your Faculty Adviser.
(See page 29).
Mechanical Engineering faculty advisers assist students with questions related to Upper Division major courses, elective courses, and career guidance.

Need General Advising?
The Academic Advising Center can help you:
- Develop an academic plan
- Evaluate transfer credit
- Choose or change a major
- Plan your next semester's schedule
- Satisfy mathematics and writing competencies
- Remove probationary status to avoid disqualification
- File for graduation

The Academic Advising Center is located in Student Services West-1551 (North of Aztec Center)
https://arweb.sdsu.edu/es/advising/contact.html
# 10.1 2019-20 Adviser Assignments for Mechanical Engineering Students

The Department Chair signs “Request for Adjustment of Academic Requirement” forms after they have been reviewed and approved by a faculty member who teaches the course.

**Note:** A change in Advisers will be periodically necessary due to faculty retirements, sabbatical leaves and the hiring of new faculty members.

11. Undergraduate and Graduate Required and Elective Courses (2019-20)

11.1 Lower Division Courses

CHEM 200. General Chemistry (5)
Three lectures, one hour of discussion, and three hours of laboratory.
Prerequisites: Knowledge of introductory chemistry as demonstrated by completion of CHEM 100 with a grade of C or better; or satisfaction of the SDSU Mathematics/Quantitative Reasoning Assessment requirement and qualification on the Chemistry Department Placement Examination.
General principles of chemistry with emphasis on inorganic materials.

CHEM 202. General Chemistry for Engineers (4)
Three lectures and three hours of laboratory.
Prerequisite: Knowledge of introductory chemistry as demonstrated by completion of CHEM 100 with a grade of C or better; or satisfaction of the SDSU Mathematics/Quantitative Reasoning Assessment requirement and qualification on the Chemistry Department Placement Examination.
General principles of chemistry with emphasis on inorganic and physical chemistry and chemistry basics for engineers.
Not open to students with credit in Chemistry 200. Restricted to chemical physics and engineering majors.

EE 204. Principles of Electrical Engineering (3)
Prerequisites: MATH 151 and PHYS 196 with a grade of C or better in each course. Circuit analysis, phasor diagrams, single-phase and three-phase power, semiconductor devices and applications, and energy conversion devices.
Not acceptable for electrical or computer engineering majors.

AE 280. Methods of Analysis (3)
Prerequisite: MATH 151 with minimum grade of C. Recommended: MATH 252.
Selected topics from ordinary differential equations, the Laplace transform, Fourier series, and linear algebra, with engineering applications.
Formerly numbered E 280.

ME 200. Statics (3) (Same course as AE 200)
Prerequisites: MATH 150 and PHYS 195 with a grade of C or better in each course. Proof of completion of prerequisites required: Copy of transcript.
Force systems, equilibrium, structures, distributed forces, friction, virtual work, moments of inertia, vector algebra.

ME 220. Dynamics (3) (Same course as AE 220)
Prerequisite: ME 200 or AE 200 and MATH 151, with a grade of C or better in each course. Proof of completion of prerequisites required: Copy of transcript.
Kinetics of a particle; central force motion; systems of particles; work and energy; impulse and momentum; moments and products of inertia; Euler's equations of motion; vibration and time response; engineering application

MATH 150. Calculus I (4) [GE]
Three lectures and two hours of activity.
Prerequisites: Knowledge of algebra, geometry, and trigonometry as demonstrated by either (1) satisfactory completion of MATH 141 with a grade of C (2.0) or above; or (2) qualification on the Mathematics Placement Assessment. Proof of completion of prerequisites required.
Algebraic and transcendental functions. Continuity and limits. The derivative and its applications. The integral and the fundamental theorem of calculus.

MATH 151. Calculus II (4) [GE]
Three lectures and two hours of activity.
Prerequisite: MATH 150 with minimum grade of C. Proof of completion of prerequisite required.

MATH 252. Calculus III (4) [GE]
Prerequisite: MATH 151 with minimum grade of C.
ME 101. Solid Modeling I (2)
Six hours of laboratory.
Introduction to 3-D computer-aided mechanical design. Creation of basic to intermediate solid parts, assemblies, and drawings to include orthographic, pictorial, section, and detail views. Dimensioning, dimension tolerancing, and thread notation per ASME Y14.5M-1994. CREO and SolidWorks software.

ME 102. Solid Modeling II (2)
Six hours of laboratory.
Prerequisite: ME 101.

ME 202. Computer Programming and Applications (3)
Two lectures and three hours of activity.
Prerequisites: MATH 151.
Principles of programming using Matlab. Syntax topics to include arrays, control flow, data types, functions and loops. Numerical methods to include curve fitting, Gauss reduction, interpolation, matrix operations, Newton-Raphson, numerical differentiation, and numerical integration. Matlab implementations. Application areas in mechanical engineering to include dynamic systems, finite element analysis, graphical user interfaces and image analysis.

ME 240. Introduction to Engineering Materials (3)
Prerequisites: CHEM 200 or 202. Proof of completion of prerequisites required: Copy of transcript
Atomic and molecular structure of materials utilized in engineering. Analysis of the relationships between structure of materials and their mechanical, thermal, electrical, corrosion, and radiation properties. Examples of material structure relevant to civil, electrical, aerospace, and mechanical engineering applications.

ME 241. Materials Laboratory (1)
Three hours of laboratory.
Prerequisite: ME 240.
Experimental methods used to characterize engineering materials and their mechanical behavior.

ME 296. Experimental Topics (1-4)
Selected topics. May be repeated with new content. See Class Schedule for specific content. Limit of nine units of any combination of 296, 496, 596 courses applicable to a bachelor's degree.

PHYS 195. Principles of Physics (3)
Prerequisites: High school physics or PHYS 180A. MATH 150 with a minimum grade of C.
Fundamental principles of physics in areas of mechanics and oscillatory motion. Designed for students requiring calculus-based physics.

PHYS 195L. Principles of Physics Laboratory (1)
Three hours of laboratory.
Prerequisite: Credit or concurrent registration in PHYS 195.
Experiments in mechanics, wave motion, resonance phenomena using precision air tracks.
Not open to students with credit in Physics 182A.

PHYS 196. Principles of Physics (3)
Prerequisites: PHYS 195 and MATH 151.
Fundamental principles of physics in areas of electricity and magnetism. Designed for students requiring calculus-based physics.
PHYS 196L. Principles of Physics Laboratory (1)
Three hours of laboratory.
Prerequisite: Credit or concurrent registration in PHYS 196.
Experiments in DC circuits, AC circuits, electrical resonance, oscilloscope measurement techniques, and electric and magnetic fields.
Not open to students with credit in Physics 182B.

PHYS 197. Principles of Physics (3)
Prerequisite: PHYS 196.
Fundamental principles of physics in areas of wave motion, sound, electromagnetic waves, optics, relativity, thermodynamics and modern physics. Designed for students requiring calculus-based physics.

11.2 Upper Division Courses (Intended for Undergraduates)
NOTE: Proof of completion of prerequisites required for all Mechanical Engineering 300-, 400-, and 500-level courses: Copy of transcript is acceptable as proof.

AE 340. Fluid Mechanics (3)
Prerequisites: ME 220 or AE 220; and credit or concurrent registration in AE 280.
Fluid statics. Laminar and turbulent flow of liquids and gases in pipes, nozzles, and channels. Dimensional analysis and modeling. Drag forces on moving or immersed objects.
Formerly numbered EM 340.

AE 341. Fluid Mechanics Laboratory (1)
Three hours of laboratory.
Prerequisite: Credit or concurrent registration in AE 340.
Formerly numbered EM 341.

ME 304. Mechanics of Materials (3)
Prerequisite: ME 200 or AE 200.
Not open to students with credit in Civil Engineering 301.

ME 310. Engineering Design: Introduction (3)
Two lectures and three hours of guided design activities.
Prerequisites: ME 102, 202, and 220 (or AE 220). Every mechanical engineering student must have a master plan on file before enrolling in ME 310.
Professional approach to engineering design problems. Problem definition, information gathering, feasibility studies, analysis, final design and communication. Several design studies and projects are completed.

ME 314. Engineering Design: Mechanical Components (3)
Prerequisites: ME 102, 202, 241, 304 (or CIVE 301).
Application of mechanics, physical properties of materials, and solid mechanics to the design of machine elements. Student design projects.

ME 330. Control Systems Laboratory (3)
Two lectures and three hours of laboratory.
Prerequisites: ME 202, 220 (or AE 220); EE 204; AE 280, 340; LING 200 or RWS 200 and PHYS 196L.
Control theory (e.g. stability, feedback, PID control) with applications in microprocessor-based control of dynamic, vibrational, and mechatronic systems. “Bread-boarding” and BASIC programming of microcontrollers and graphical programming of PC-based controller interfaces.
ME 350. Thermodynamics (3)
Prerequisites: MATH 252 and ME 200.
Basic concepts and principles of thermodynamics with emphasis on simple compressible substances. First and second law analysis, entropy, exergy analysis and state relations.
*Not open to students with credit in ME 352.*

ME 351. Engineering Thermodynamics (3)
Prerequisites: ME 350

ME 430. System Modeling and Analysis (3)
Prerequisites: ME 330.

ME 452. Principles of Heat Transfer (3)
Prerequisites: ME 350 and AE 340.
Analytical and numerical solutions of steady and transient one- and two-dimensional conduction problems, forced and natural convection in external and internal flows, and thermal radiation. Applications.

ME 490A-490B. Engineering Design: Senior Project (3-3)
One lecture and four hours of guided design activities.
Prerequisites for 490A: ME 304 (or CIVE 301), 310, 314, 452.
Prerequisites for 490B: ME 490A, 495. Biology majors: ME 490A.
Applications of engineering principles and design techniques to the designing, building, and testing of an engineering system. A single project is completed in this two-course sequence and is judged completed upon presentation of an oral and a written report. In addition, issues related to ethics and engineering practice are discussed.

ME 495. Mechanical and Thermal Systems Laboratory (2)
One lecture and three hours of laboratory.
Prerequisites: ME 310, 330, 351, 452.
Data acquisition theory, instrumentation, sensors, data reduction, statistical and uncertainty analysis, and design of experiments. Experience in designing, performing, and reporting experiments on mechanical and thermal systems, mechanisms, vibrations, structures, thermodynamics, heat transfer.

ME 496. Advanced Mechanical Engineering Topics (1-3)
Prerequisite: Consent of instructor. **Proof of completion of prerequisite required:** Copy of transcript.
Modern developments in mechanical engineering. See **Class Schedule for** specific content. Maximum credit nine units for any combination of ME 496, 499 and 596.

ME 499. Special Study (1-3)
Prerequisite: Consent of instructor. **Proof of completion of prerequisite required:** Copy of transcript.
Individual study. Maximum credit nine units for any combination of Mechanical Engineering 496, 499 and 596.

11.3 Upper Division Courses (Also Acceptable for Advanced Degrees)
**NOTE:** **Proof of Completion of prerequisites required for all 300-, 400-level courses, and ME 500-:** Copy of transcript.

ME 520. Introduction to Mechanical Vibrations (3)
Prerequisites: ME 304 (or CIVE 301) and 330.
Analysis of mechanical vibration; single- and multi-degree of freedom systems; free and forced vibrations; vibration isolation, vibration absorbers. Theory of vibration measuring instruments.
ME 530. Automatic Control Systems (3)
Prerequisite: ME 330.
Dynamic characteristics of control components and systems. Stability and response of closed loop systems. Design of control systems.

ME 535. Mechanics of Composite Structures (3)
(Same course as AE 535)
Prerequisites: AE 280 and AE 310 or ME 314.
Micro- and macro-mechanics of composite materials, classical lamination theory, initial failure prediction and progressive failure analysis of beam and plate structures, stiffness and strength based design of composites.

ME 540. Nonmetallic Materials (3)
Prerequisites: ME 314.

ME 543. Powder-Based Manufacturing (3)
Prerequisite: ME 240.
Manufacturing of micro and nano-structured engineering components and composites starting with metal and/or ceramic powders. Powder production methods, characterization, powder shaping and compaction, sintering, hot consolidation, design considerations, and finishing operations.

ME 552. Heating, Ventilating, and Air-Conditioning (3)
Prerequisites: ME 351 and 452.

ME 554. Automotive Power (3)
Prerequisites: ME 351 and 452.
Conventional and emerging energy conversion devices for automotive applications to include fuel-cell, hybrid, and internal combustion engines. Alternative fuels to include biofuels, cleaner fossil fuels, hydrogen, and natural gas. Well-to-wheel energy and cost analysis of prime mover designs/fuels.

ME 555. Thermal Systems Analysis and Design (3)
Prerequisites: ME 351 and 452.
Analysis, design, and optimization of thermal systems using microcomputers. Modeling of thermal systems and components. Thermal system component characteristics and their effect on overall system performance. Relationship among thermal sciences in design process. Introduction to thermoeconomic optimization.

ME 556. Solar Energy Conversion (3)
Prerequisites: AE 340, ME 351 and 452.
Application of thermodynamics, fluid mechanics and heat transfer to the thermal design of solar energy conversion systems. Computer simulations utilized.

ME 580. Biomechanics (3)
Prerequisites: ME 304 (or CIVE 301) and AE 340.

One lecture and four hours of laboratory.
Prerequisites: For aerospace engineering majors: EE 204, AE 220, and ME 240. For electrical engineering majors: EE 330 and ME 240. For mechanical engineering majors: ME 220 and ME 240.
Microfabrication techniques, microsensors and microactuators, and scaling laws. A design project of a micro-device including schematic creation, test of performance, layout generation, and layout versus schematic comparison.
ME 596. Advanced Mechanical Engineering Topics (1-3)
Prerequisite: Consent of instructor.
Modern developments in mechanical engineering. May be repeated with new content. See Class Schedule for specific content. Maximum credit of nine units for any combination of ME 496, 499 and 596 applicable to a bachelor's degree. Credit for 596 and 696 applicable to a master's degree with approval of the MS Graduate adviser.

11.4 GRADUATE COURSES (accessible to BSME students only with special permission)
ME 610. Finite Element Methods in Mechanical Engineering (3)
Prerequisites: AE 280 with a grade of C or better.
Development of finite elements and an introduction to solution methods. Problems from various fields of study in mechanical engineering such as stress analysis, vibrations and heat transfer. Introduction to finite element programs such as NASTRAN.

ME 640. Nanomaterials (3)
Prerequisite: ME 543.
Nanomaterials compared with conventional materials. Nanomaterials synthesis, characterization, properties, and applications.

ME 645. Mechanical Behavior of Engineering Materials (3)
Prerequisites: ME 314 and 350.

ME 646. Mechanics of Sintering (3)
Prerequisites: Classified graduate standing.
Practical aspects and conceptual models and mechanisms associated with sintering of ceramic and metal powders.

ME 651. Advanced Thermodynamics (3)
Prerequisites: AE 280 with a grade of C or better and ME 351.
Advanced concepts of macroscopic thermodynamics are developed including entropy generation, irreversibility, effectiveness, exergy, and chemical exergy of fuels. Concepts applied to power and refrigeration cycles using computer software.

ME 653. Combustion (3)
Prerequisite: ME 351.
Thermodynamics of combustion, chemical equilibrium, chemical kinetics, combustion of gaseous, liquid and solid fuels, and their application.

ME 656. Conduction Heat and Transfer (3)
Prerequisites: ME 452.
Conduction heat transfer analysis of multi-dimensional and transient processes using both classical analysis and numerical methods.

ME 657. Convection Heat Transfer (3)
Prerequisites: ME 452 and AE 515.
Convection heat transfer processes under laminar and turbulent conditions. Mass transfer. Scaling arguments, analytical and numerical modeling.

ME 658. Radiation Heat Transfer (3)
Prerequisites: ME 452 and AE 515.
ME 661. Gas Dynamics (3)
Prerequisites: ME 351 and AE 515.
Thermodynamics of high velocity compressible fluid flow. Adiabatic and diabatic flow; shock phenomena; imperfect gases; multidimensional flow. Applications to the propulsive duct and turbomachinery.

ME 681. Biomaterials (3)
Prerequisites: ME 240 and 580.

ME 683. Design of Medical Devices (3)
Prerequisites: ME 314 and 580.
Device design, including biomaterials, human factors engineering, reliability, and manufacturing. Topics relevant to industry reviewed include regulatory, documentation, quality, and legal.

ME 685. Micro-Electro-Mechanical Systems (MEMS) Design and Applications (3) (Same course as Electrical Engineering 685)
Prerequisite: ME 585.
Design and manufacturing technology for micro- and nano-scale devices. Topics include solid-state transducers, microscale physics, biomedical microelectronics, microfluidics, biosensors, and hybrid integration of microfabrication technology. Emphasis on biomedical applications.

ME 696. Advanced Topics in Mechanical Engineering (2 or 3)
Intensive study in specific areas of mechanical engineering. May be repeated with new content. See Class Schedule for specific content. Credit for 596 and 696 applicable to a master's degree with approval of the graduate adviser.

ME 797. Research (1-3) Cr/NC/RP
Prerequisites: Consent of graduate adviser and advancement to candidacy. Research in engineering. Maximum credit six units applicable to a master's degree.

ME 798. Special Study (1-3) Cr/NC/RP
Prerequisite: Consent of graduate adviser; to be arranged with department chair and instructor. Individual study or internship. Maximum credit three units applicable to a master's degree.

ME 799A. Thesis or Project (3) Cr/NC/RP
Prerequisites: An officially appointed thesis committee and advancement to candidacy. Preparation of a project or thesis for the master's degree.

ME 799B. Thesis or Project Extension (0) Cr/NC
Prerequisite: Prior registration in Thesis or Project 799A with an assigned grade symbol of RP. Registration required in any semester or term following assignment of RP in Course 799A in which the student expects to use the facilities and resources of the university; also student must be registered in the course when the completed thesis or project is granted final approval.
